SKILLS

- Python
- JavaScript
- Markup Languages
- Full Stack Development
- Best practices implementation
- User Interface
- Git/GitHub
- Cybersecurity best practices

Micah Tanner

PROGRAMMING EXPERIENCE

- Python - 5 years of hobbyist programming experience including applications with real users.
- Markup - Proficient in CSS and HTML.
- JavaScript - Midlevel of proficiency in JavaScript development and experience of over a year and a half.

OTHER EXPERIENCE

- Five years of experience with Linux servers and four years of experience in Linux desktop.
- Created simple AIs using TensorFlow and have used Ollama with Open WebUI to automate tasks and create quality of life tools.
- Creating docker containers for high security and reliability.
- Four google certifications in cybersecurity and best practices composed of • Foundations of Cybersecurity • Play it Safe • Connect and Protect and • Tools of the Trade.

NOTABLE PROJECTS

- Encryption Software, this application takes files and folders and then securely stores them to prevent theft or misplacement of data. With • 1000 lines of Python • 2000 lines of JavaScript • 2000+ lines of markup languages.
- Portfolio is a self-hosted website programmed using markup and JavaScript.
- Green House Control System, A system to control irrigation, temperature and humidity of a greenhouse based off preset rules or manual input through a webpage and rudimentary API.
- Backup Software, A simple program to automatically back up files and folders to protect user data.
- Simple AI Builder, A simple tool to quickly make, train, and test innovative AI models for quality-of-life tools, to keep up with emerging technologies and to keep up with industry trends.

JOB EXPERIENCE

January 2022 - Current
Sales Associate Stratton | Equity CO-OP

- Performed diverse tasks including manual labor, assisting with additional duties as needed, operating and maintaining lawn care equipment, and providing excellent customer service as a cashier. Demonstrated versatility, reliability, and a strong work ethic in completing a variety of responsibilities effectively.

January 2025 - Current
Certified Developer | Brain Trust

- Brain trust is a freelance development platform where companies recruit developers for tasks such as • AI training • AI prompting • Coding exercise and • Coding Applications.

LEADERSHIP EXPERIENCE

- Stratton Student Leadership, Student body group that assists admin in facilitating change through the school and community. With my time here I learned • problem solving • taking constructive feedback • leadership skills and • teamwork skills.
- Stratton FFA, a local organization aiming to positively impact the lives of its members by helping them develop their leadership and personal growth.

Treasurer where I learned • communication skills • problem-solving skills • Organizational skills and • analytical skills.

Sentinel (an office in charge of responsible for maintaining order, welcoming guests, caring for the meeting room and more) where I learned • greeting people • welcoming and caring for guests and • effectively organizing and setting up meetings and events.

EDUCATION AND TRAINING

High School Diploma
Stratton High, Stratton
Expected May 2025

Google Certifications in Cybersecurity

- Foundations of Cybersecurity
- Play it Safe
- Connect and Protect
- Tools of the Trade
